

Data from tiger project are of different nature and related to very different scales.

In order to help finding the data, we classify them using the structure of the final report:

- **finalreport\_main\_data.rar** contains all data “behind the maps of the main report. Files are named according to the figure to which it refers
- all other data files relate to the scientific annex. Data have been classified according to the Working paper to which it refers (as much as possible the files included refers to the figure in the working paper but also provides in some cases complete matrix of flows at different scales):
  - **wp1\_worldindicators.rar** contains all data on competitiveness and cohesion at national level for the whole world
  - **wp2-3-10-15-17.rar** contains structural and network data on EU cities
  - **wp7\_comext\_regions.rar** contains data of external trade at regional level for EU regions;
  - **wp10\_stockexchange.rar** contains data on stock exchange flows;
  - **wp13\_migrations.rar** contains data on migrations at different scales
  - **wp14\_studentflows.rar** contains the matrix of students flows at national level
  - **wp18\_eutreaties.rar** contains all EU treaties in function of the date, the country with which it has been signed and the domain it covers
  - **wp19\_regionalization\_trade.rar** contains data on world trade and regionalization process
