

Indicator metadata: Open Data

The Open data dimension measures the ability of the public authority to adopt and operationalise principles and framework for open data that are meant to improve performance and efficiency of government services in general. The term open data, or Open Government Data identifies the information collected, produced, or paid by the public bodies and made available for re-use for any purpose, under licences which specify the terms of use. By sharing their datasets under open licences, public institutions are improving the availability of datasets for citizens, associations, innovators, and other stakeholders. Increased efficiency in public service operations and delivery can be gained through cross-sector data sharing. Easier and improved access to information, resources, and expertise can favour the economical sustainability of service provision, allowing for the development of innovative services and the introduction of new business models.

Theme(s): Governance - Governance

Introduction

Author: ESPON Database (<https://database.espon.eu/>)
