

Indicator metadata: Gross domestic product (GDP) at current market prices (PPS per Inhabitant)

GDP (gross domestic product) is an indicator of the output of a country or a region. It reflects the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in PPS (purchasing power standards) eliminates differences in price levels between countries. Calculations on a per inhabitant basis allow for the comparison of economies and regions significantly different in absolute size. GDP per inhabitant in PPS is the key variable for determining the eligibility of NUTS 3 regions in the framework of the European Union's structural policy.

Theme(s): Economy, finance and trade
